

**WE'RE LICENSED TO KILL - WHAT'S BUGGING YOU?**

# ANT CLEAN-OUT INFORMATION SHEET

Thank you for choosing Richland Pest and Bee Control!  
We are very happy to be of service to you and your satisfaction is the most important thing to us.  
Here are a few things you should know about your ant service:

## PRIOR TO TREATMENT

Remove all items from under all sinks, including kitchen, bathrooms and laundry room sinks.

---

## INSIDE/OUTSIDE CLEAN-OUT SERVICE

The goal of the Inside/Outside Clean-Out Service is to eliminate the ant colony within the structure by attacking both the interior and exterior of the structure. This service is a one-time treatment which includes a 30-day guarantee. Please note, it is common to see activity for up to 30 days after treatment as flushing occurs, but if you notice an excessive amount of activity more than two weeks following the treatment, we will return for a second treatment at no additional cost.

---

## FOLLOW UP

You may still see some activity for up to 30-60 days after treatment. Please note that flushing, or seeing a major influx of ants inside, may occur, even up to two weeks after the treatment. Please vacuum ants if this happens. The treatment plan as outlined above is aimed at the eradication or prevention of Carpenter Ants.

In order to prevent ants from returning after the completion of your clean-out service, you may wish to enroll in our Pest+ Prevention Program. Our Pest+ program is designed to prevent future infestations by performing regular maintenance throughout the season. If you wish to enroll in preventative services, please inform our office by calling 800-308-9126.
