

WE'RE LICENSED TO KILL - WHAT'S BUGGING YOU?

EXTERIOR ANT TREATMENT INFORMATION SHEET

Thank you for choosing Richland Pest and Bee Control!
We are very happy to be of service to you and your satisfaction is the most important thing to us.
Here are a few things you should know about your service:

EXTERIOR ANT TREATMENT

Our one-time exterior ant treatment is designed to treat & prevent ant colonies from establishing nests on the interior of the structure. Your one-time exterior service will include a 30-day guarantee during which time we will retreat the areas for no additional charge if activity persists.

The product we use to exterminate and prevent ants is a non-repellent chemical that is formulated to be tracked back to the main nest. This type of chemical does not kill the ants instantly, therefore it's common to see activity for several weeks following treatment. During this time, the ants are doing the work for you by bringing the chemical back to their nest.

Please call the office at 800-308-9126 if you have any questions about your treatment.

FOLLOW UP

You may still see some activity for up to 30-60 days after treatment. Please note that flushing, or seeing a major influx of ants inside, may occur, even up to two weeks after the treatment. Please vacuum ants if this happens. The treatment plan as outlined above is aimed at the eradication or prevention of carpenter ants.

In order to maintain ants outside your home, we recommend signing up for our Pest+ Prevention service, which is applied a minimum of two times per year. With our Pest+ program, additional treatments, if needed, are no additional cost. Our Pest+ program also includes the added benefit of having over two-dozen crawling nuisance pests covered under your package pricing. That includes common pests such as spiders, centipedes, stink bugs and more. See our website for a full list of covered pests. If you would like more information about signing up for our Pest+ Prevention plan, please call the office at 800-308-9126 for your customized estimate.
